SELF-SERVICE HR
OPERATIONS PLATFORM

PITCH DECK

Team 014 | Deepiga, Mariia, Nikita, Shaidan

Presented by

Nikita & Mariia

PROBLEMS

PROBLEMS

1

Manual Document Generation

Every hire requires multiple contracts, NDAs, and equity docs — each customised manually. It takes hours per person.

2

Repetitive Policy Questions

Employees ask the same questions repeatedly (leave, benefits, expenses). Every question interrupts someone's work.

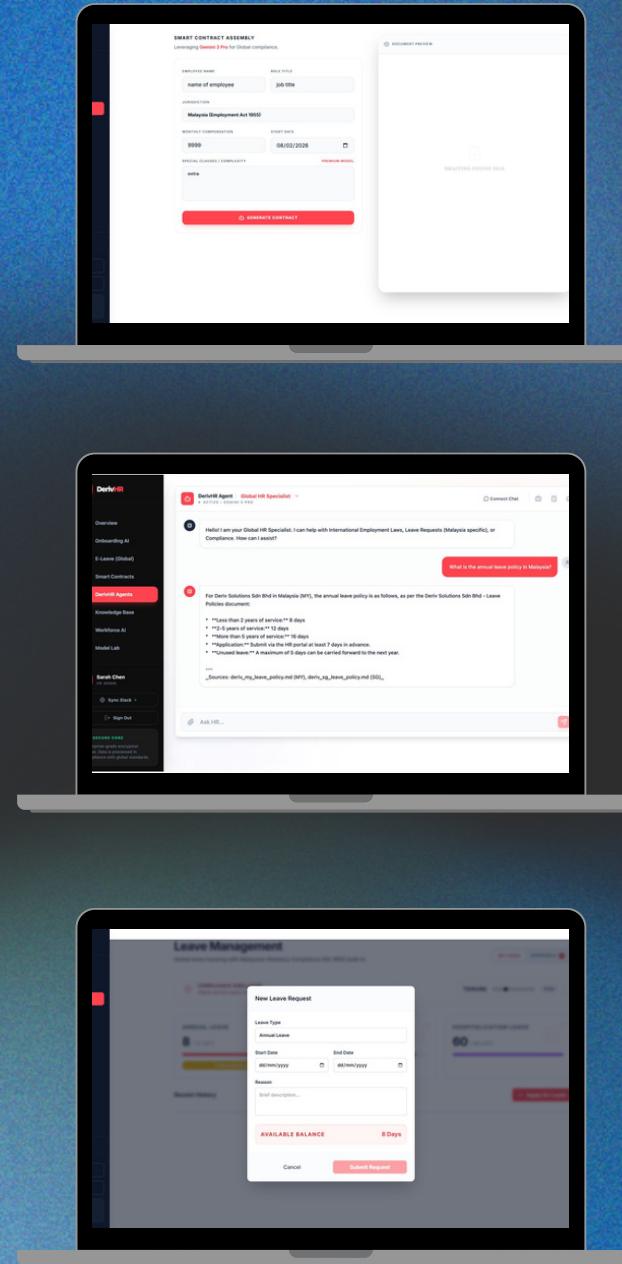

3

Error-Prone Compliance Tracking

Work permits, visas are tracked in spreadsheets. Manual tracking leads to missed deadlines and audit risks.

AI-Powered Contract Generation

RAG-Based HR Chatbot

Smart Onboarding & Tracking

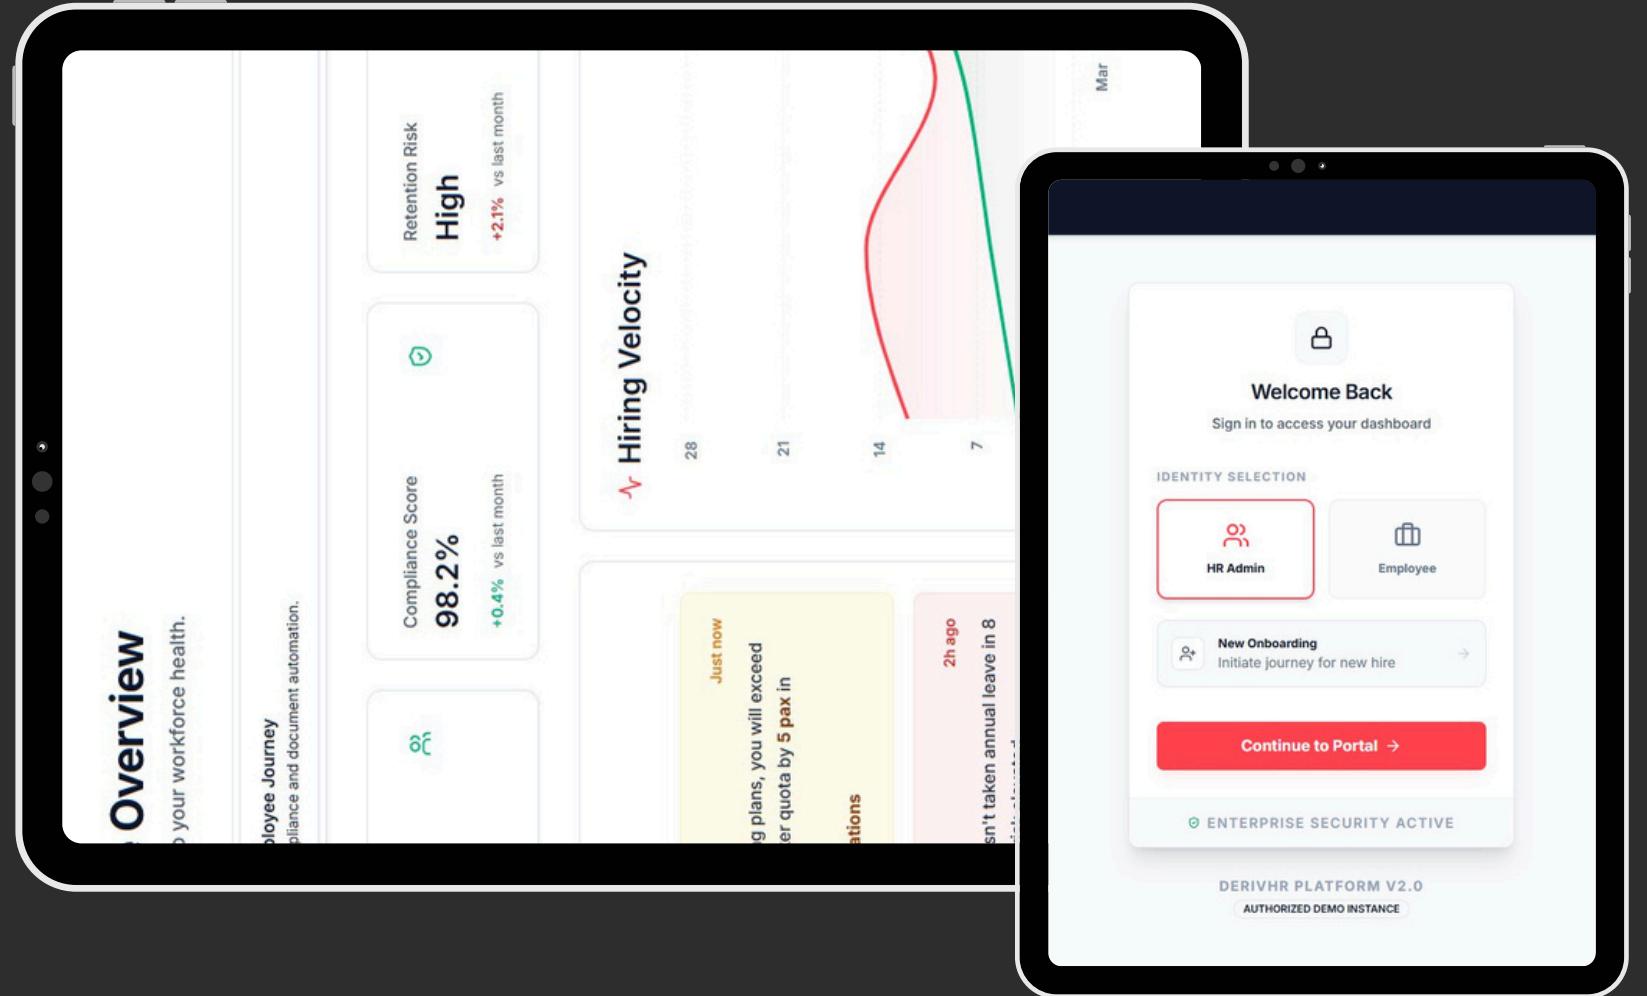

PRODUCTOUR PRODUCT

DerivHR is an AI-powered self-service platform that lets HR teams onboard employees, generate jurisdiction-compliant contracts, and answer policy questions — all without manual work. Employees can ask HR questions instantly through the web portal or messaging apps, while HR admins track onboarding, manage leave, and generate legal documents for Malaysia and Singapore with a few clicks.
